PRODUCT SOFTWARE NOTICE

Product software of all kinds, such as brochures, drawings, technical data, operator's and workshop manuals, parts lists and parts price lists, and other information, instructions and specifications provided from sources other than Westerbeke, is not within Westerbeke's control and, accordingly, is provided to Westerbeke customers only as a courtesy and service. WESTERBEKE CANNOT BE RESPONSIBLE FOR THE CONTENT OF SUCH SOFTWARE, MAKES NO WARRANTIES OR REPRESENTATIONS WITH RESPECT THERETO, INCLUDING THE ACCURACY, TIMELINESS OR COMPLETENESS THEREOF, AND WILL IN NO EVENT BE LIABLE FOR ANY TYPE OF DAMAGES OR INJURY INCURRED IN CONNECTION WITH, OR ARISING OUT OF, THE FURNISHING OR USE OF SUCH SOFTWARE.

For example, components and sub-assemblies incorporated in Westerbeke's products and supplied by others (such as engine blocks, fuel systems and components, transmissions, electrical components, pumps and other products) are generally supported by their manufacturers with their own software, and Westerbeke must depend on such software for the design of Westerbeke's own product software. Such software may be outdated and no longer accurate. Routine changes made by Westerbeke's suppliers, of which Westerbeke rarely has notice in advance, are frequently not reflected in the supplier's software until after such changes take place.

Westerbeke customers should also keep in mind the time span between printings of Westerbeke product software, and the unavoidable existence of earlier, non-current Westerbeke software editions in the field. Additionally, most Westerbeke products include customer-requested special features that frequently do not include complete documentation.

In sum, product software provided with Westerbeke products, whether from Westerbeke or other suppliers, must not and cannot be relied upon exclusively as the definitive authority on the respective product. It not only makes good sense but is imperative that appropriate representatives of Westerbeke or the supplier in question be consulted to determine the accuracy and currency of the product software being consulted by the customer.

This diagram illustrates the exploded view of a mechanical assembly, likely a pump or engine component. The main body is a cast metal housing with three large circular openings on top. The assembly includes the following numbered parts:

- 1**: The main cast metal housing.
- 2**: Two O-rings, one for the front flange and one for the side flange.
- 3**: A small cylindrical pin or plug for the top left opening.
- 4**: A small cylindrical pin or plug for the top middle opening.
- 5**: A small cylindrical pin or plug for the top right opening.
- 6**: A small cylindrical pin or plug for the side flange.
- 7**: A large bolt for the side flange.
- 8**: A square flange plate for the side flange.
- 9**: A small cylindrical pin or plug for the side flange.
- 10**: A small cylindrical pin or plug for the side flange.
- 11**: A small cylindrical pin or plug for the side flange.
- 12**: A small cylindrical pin or plug for the side flange.
- 13**: A small cylindrical pin or plug for the side flange.
- 14**: A small cylindrical pin or plug for the side flange.
- 15**: A small cylindrical pin or plug for the side flange.
- 16**: A large bolt for the front flange.

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or valve cover, onto a main engine block. The components are numbered as follows:

- 1:** A long, thin gasket or seal strip.
- 2:** A large, curved metal housing or cover plate.
- 3, 4, 5:** Various screws and bolts used for fastening the housing.
- 6, 7:** A small bracket or support piece with associated fasteners.
- 8, 9:** A circular flange or gasket component.
- 10, 11, 12, 13:** A series of bolts and washers for the main assembly.
- 14, 15:** Two small rectangular spacers or shims.
- 16:** A complex metal bracket or armature.
- 17, 18:** Small pins or screws for internal fastening.
- 19:** A small cylindrical component, possibly a pin or plug.
- 20:** A screw for the lower assembly.
- 21, 22:** A circular flange or gasket with a central pin.
- 23, 24:** A bracket or support piece for the lower assembly.

The diagram shows the spatial relationship between these parts, with dashed lines indicating the assembly path and alignment points. The main engine block is shown on the right, with the assembly being attached to its side.

This technical drawing is an exploded view of a mechanical assembly, likely a pump or valve. The components are numbered 1 through 33. The main assembly (1) is shown at the top left, featuring a central body with three vertical ports and a side flange. A detailed inset on the left shows a close-up of a cable or hose connection (24) with a plug and a bracket (12). The central shaft (23) is shown with various seals (26, 27) and a gear (28) at the bottom. The bottom right shows a separate component (32) with a cable (30) and a plug (33). The right side shows a disassembled view of the top section (3) with a bracket (4) and a flange (5). The bottom right shows a disassembled view of the bottom section (6) with a bracket (7) and a flange (9). The bottom right shows a disassembled view of the bottom section (10) with a bracket (11) and a flange (13). The bottom right shows a disassembled view of the bottom section (14) with a bracket (15) and a flange (16). The bottom right shows a disassembled view of the bottom section (17) with a bracket (18) and a flange (19). The bottom right shows a disassembled view of the bottom section (20) with a bracket (21) and a flange (22). The bottom right shows a disassembled view of the bottom section (25) with a bracket (26) and a flange (27). The bottom right shows a disassembled view of the bottom section (30) with a bracket (31) and a flange (32). The bottom right shows a disassembled view of the bottom section (33) with a bracket (34) and a flange (35).
