OPERATING INSTRUCTIONS

Pump will self-prime at low or high speeds. Make sure scoop and inlet line are clear and all connections airtight. Do not run pump dry for more than 30 seconds. Lack of water flow may damage impeller. To drain pump, loosen end cover screws.

SERVICE INSTRUCTIONS

IMPELLER REPLACEMENT: Remove end cover and gasket. Pull impeller out by grasping hub or blades with pliers. Replace impeller, gasket and end cover. A light coating of grease in impeller bore will aid priming on dry start up. (Use correct Jabsco gasket, a thicker or thinner gasket may cause impeller damage.) Standard gasket is 0.010" thick.
