PRODUCT SOFTWARE DISCLAIMER

Product software of all kinds such as brochures, drawings, technical data, operator's and workshop manuals, parts lists and parts price lists, and other information, instructions and specifications provided from sources other than Westerbeke, is not within Westerbeke's control and, accordingly, is provided to Westerbeke customers only as a courtesy and service. **Westerbeke cannot be responsible for the content of such software, makes no warranties or representations with respect thereto, including the accuracy, timeliness or completeness thereof, and will in no event be liable for any type of damages or injury incurred in connection with, or arising out of, the furnishing or use of such software.**

For example, components and subassemblies incorporated in Westerbeke's products and supplied by others (such as engine blocks, fuel systems and components, transmissions, electrical components, pumps and other products) are generally supported by their manufacturers with their own software, and Westerbeke must depend on such software for the design of Westerbeke's own product software. Such software may be outdated and no longer accurate. Routine changes made by Westerbeke's suppliers, of which Westerbeke rarely has notice in advance, are frequently not reflected in the supplier's software until after such changes take place.

Westerbeke customers should also keep in mind the time span between printings of Westerbeke product software, and the unavoidable existence of earlier, non-current Westerbeke software editions in the field. Additionally, most Westerbeke products include customer-requested special features that frequently do not include complete documentation.

In summation, product software provided with Westerbeke products, whether from Westerbeke or other suppliers, must not and cannot be relied upon exclusively as the definitive authority on the respective product. It not only makes good sense but is imperative that appropriate representatives of Westerbeke or the supplier in question be consulted to determine the accuracy and currency of the product software being consulted by the customer.

THIS PARTS LIST COVERS A FAMILY OF TWO ENGINE BLOCKS USED FOR GENERATOR APPLICATIONS. ALL REFERENCES IN THE BOOK REFER TO THE 60 HERTZ MODEL BUT ARE APPLICABLE FOR THE CORRESPONDING 50 HERTZ MODEL AS LISTED IN THE CHART BELOW. THE 7.0 BCGA MODEL IS AVAILABLE FOR 60 HERTZ OPERATION ONLY.

60HZ GENERATOR	50HZ GENERATOR
4.5 BCG-614	3.4 BCG-514
7.0 BCG-614	5.0 BCG-514
7.0 BCGA-614	NOT AVAILABLE
